TITLE OF INVENTION: E- Commerce Role Playing "Platform"

CROSS-REFERENCE: NOT APPLICABLE

BACKGROUND- FIELD OF INVENTION

This invention relates to Internet game playing, while it is not a game, it is a computer program designed to work with Internet game play.

Specifically to provide the user with ability to set-up a "game account" which will accept deposits, enable a user to make purchases, build characters, accept winnings, and pay the opponent upon defeat. To provide the user "place" to return to and control of their game account via the PLATFORM. The PLATFORM is a "virtual storage" and/or "virtual safe deposit box" it provides the ability for the user to store and access a history of events, game statistics, tracking of game events, and account transactions.
